Purpose: This procedure describes how to clear the cache from your Chrome web browser.

Step 1  Open Chrome web browser. Open the Options tab by clicking on the spanner/wrench button at the top right of the browser window, then clicking on Options menu.

Step 2  You should now see the Options tab. Click on the Under the Hood menu, then click on the Clear browsing data… button.
Step 3  The Clear Browsing Data window will open. Click on the tick box next to Empty the cache (if it’s not already ticked). Un-tick any other boxes that have ticks in them. Click on the drop-down menu arrow and select ‘the beginning of time’. Click on the Clear browsing data button.

You have now cleared the cache. You can close the Options tab.
